ANNEALED WIRE

Ductile resistance.
A true fact.

DESCRIPTION

Thanks to an annealing process of the wire that reconstructs its microstructure, the construction Annealed Wire can obtain a high ductility that facilitates its folding or hand knotting. To manufacture this product the highest technology is applied, as well as raw materials of international quality.

PRESENTATION

Rolls of 50 kg. with four ties, other sizes may be ordered

ADVANTAGES

- Tension resistance 36kgf/mm²
- High ductility
- Greater malleability

APPLICATIONS

- Formation of construction castles
- Reinforcing slabs
- Structural steel ties
- Mesh overla
