GALVANIZED CYCLONIC MESH

Resistance that protects.
A true fact.

DESCRIPTION

Cyclonic mesh is manufactured utilizing our galvanized wire, which is tensed and intertwined in zigzag, forming diamonds. The ends of the wires can be gimped (to form picks) or folded to form a knot and prevent unraveling of the fence.

The most advanced technology is used in manufacturing the mesh, as well as utilizing international quality wire rod as raw material.

PRESENTATION

Compact rolls with a linear length of 20 mts
Other gauges, dimensions, openings and finishes available upon request.

NORMS

Excellent quality compliance: with the quality norm ASTM-A-392

ADVANTAGES

- Corrosion resistance (commercial class galvanized)
- Homogenous in its mechanical properties
- Height and opening optimum measurements
- Easier installation

APPLICATIONS

- Protection fences
- Delimitations of agricultural, livestock farmers and residential spaces
- Perimeter fences
- Landslides retention
- Internal walls of sports centers
- Warehouses
- Parking lots
- Zoo cages
